

Innovative design, high quality materials, the latest manufacturing techniques and an almost obsessive commitment to quality control are the hallmarks and guiding principles of this premium but affordable range of contemporary design doors.

Using ecologically friendly materials and available in a choice of contemporary colours - white, grey, cream etc - these doors represent a modern and environmentally conscious choice and very much in keeping with the customer's expectation that the product should be functional, attractive and minimally impactful in terms of our global natural resources.

Erkado is a Polish family-run door manufacturing business that has been in operation since 1976. With an annual production volume of almost 750000 doors Erkado supplies not only the domestic market in Poland for interior and exterior doors but is also catering for an ever expanding export market for its products in over 16 countries worldwide.

ERKADO
